How to wear Hijab
How to Wear Hijab

Hijab Style 1:

**Step 1.** Place a pashmina over your head with one side longer than the other, as seen in the picture.

**Step 2.** Fold back the scarf behind the nape/neck so the two edges meet together.

**Step 3.** Using a safety pin, pin the two edges together behind the back of the neck.

**Step 4.** This picture shows the front view of step 3. When pinning behind the neck, make sure the front of the scarf has a smooth finish and is a comfortable fit.

**Step 5.** Take the longer end of the scarf and start to bring round under the chin.
Step 6. Continue to take the scarf up round to the other side. You may have to adjust the rest of the scarf around the shoulders a little so that it wraps round smoothly.

Step 7. Here is a side view of step 6. This will help understand step 7 more clearly.

Step 8. This picture shows how the scarf has been brought round to the opposite side.

Step 9. Adjust the scarf so it falls evenly around your shoulders, you may also have to finger comb the the scarf at the forehead so no creases show on the front part of the scarf. Once everything is to your satisfaction, pin the top scarf to the part around the neck.

Step 10. Front view of step 9. Once the scarf has been pinned, you can adjust the scarf a little more until you’re happy with the way it looks.
Hijab Style 2:
This second style starts off the same as style 1, the difference being that this style offers a smoother continuous finish at the front with the end of the hijab pinned at the back of the head.

Step 1. Place a pashmina over your head with one side longer than the other, as seen in the picture.

Step 2. Fold back the scarf behind the nape/neck so the two edges meet together.

Step 3. Using a safety pin, pin the two edges together behind the back of the neck.

Step 4. This picture shows the front view of step 3. When pinning behind the neck, make sure the front of the scarf has a smooth finish and is a comfortable fit.

Step 5. Take about 20cm from the longer end of the scarf and start to bring it up towards the top of the head, near the center.
Step 6. Using a pin, secure the edge of the hijab to the top of the head. Make sure it is pinned in the center of the head or slightly over to the other side. This ensures the ends can’t be seen when style is completed. Another point to note, for slippery fabrics such as chiffon and georgette, pin well over past the centre and over to the other side of the head, this will ensure the hijab stays firmly in place as arranged.

Step 7. Pick up the hijab from where it was pinned in step 6. Start to bring the scarf back down towards the chin.

Step 8. Continue to bring the scarf round under the chin.....

Step 9. .....and to the other side.

Step 10. Continue to bring up and over the head toward where the scarf was pinned in step 6.
**Step 11.** Pin the edge of the scarf just over where it was pinned in step 6. Alternatively, the pin can be taken out and both edges pinned together. Ensure the bottom edge stays under and is covered by the top layer.

**Step 12.** This shows how the hijab looks at the back.

**Step 13.** Take the scarf along the fold on the left hand side and pull it forward to the right side. This is why it was mentioned in step 6 that slippery scarves should be pinned past the center otherwise this fold will keep falling back.

**Step 14.** Final step, now take the right side of the hijab and bring it up and over the bottom layer.

**Step 15.** You can adjust the scarf at the front and back a little more until you’re happy with the way it looks.
The mona hijab is a relatively new design which is currently only available online. Hijab Store Online is the first website to be offering this new design. It is very easy to wear and also perfect for new muslimahs who have just been introduced to the hijab.

The mona hijab is a one piece hijab consisting of a stretch underscarf with a shayla/scarf attached. When the underscarf is put on, the attached shayla falls naturally into place and just needs to be wrapped once round the head and fastened with a hijab pin or tucked under the chin. The fabric of the underscarf is non-slip and will stay in place.

**Step 1.** Place the mona hijab onto the head, if layering with a lace band, add that on first as shown in the picture. For easy fitting, find the peak/front part of the hijab and slide the underscarf over the head, ensuring that the ‘peak’ stays at the front. Similar to how you would wear a one piece al-amira hijab (without the attached shayla).

**Step 2.** With a mona hijab, one side of the shayla is always longer than the other. Take the longer part of the attached shayla and bring it round under the chin....

**Step 3.** .....over the head,

**Step 4.** .....and to the opposite side. Pin into place. There you have it, the perfect hijab look with the minimum of fuss!
Velcro Hijab:
The 'Velcro Hijab' is a new design, exclusive to Hijab Store Online. These have elastic velcro attached to the front of the hijab which is then connected at the back of the neck for a secure, neat finish.

**Step 1.** First image shows how the elastic velcro is connected to the ends of the front part of the hijab.

**Step 2.** The velcro ends are taken to the back of the nape and fastened at the back of the neck, giving a clean secure fit.

**Step 3.** For a simple finish, one end of the hijab can be placed over one shoulder.

**Step 4.** Following on from the last image, the other end is placed over the other shoulder. This can also be pinned at the back of the head for a more secure finish with a hijab pin.
**Turban Style Bonnets:**

NEW design turban style bonnets. Easy to wear and wrap as shown below.

**Step 1.** Centre ruched portion on head.

**Step 2.** Take sides to the back of the head and bring each side round to the front on the opposite shoulder.

**Step 3.** Fold sides and swing around head.

**Step 4.** Let it overlap in the centre, proceed alternating sides until no more fabric is left.

**Step 5.** Tuck excess parts underneath. As an alternative, tuck one end in and bring the other round to the front and pin up at the side, below the ear. Or add a shayla/scarf and drape as you wish on the turban.
